Healthcare Door Hardware for Life Safety and Security

With the right door hardware, we can keep healthcare facilities secure and safe, protecting patients and vulnerable individuals from danger as well as ensuring the maximum security for certain areas within the building. Haroon company will be able to provide you a perfect solution for your medical facility openings. Whether its patient rooms, x ray rooms, ADA compliant hardware, Anti-microbial hardware, Life safety hardware or glass fittings and movable partitions between the wards we can provide safe and secure hardware products to fit the exact requirements. For the healthcare sector, we help to transform the ordinary into unique with features that enhances your facility and support to the patients, visitors and staff. Our comprehensive hardware solutions support your provision of care, treatment and services to create an environment that is inclusive of all patients.

Access to Health

Haroon company architectural division presents a total package solution for architectural ironmongery, automatic and manual door operating devices, access control security devices and signage solutions uniquely suited to heavy-use, high-abuse health care areas, with products that meet the stringent requirements for the health care sector.

The products and services offered under the Access to Health initiative offer a complete design specification for door sets and architectural hardware, assisting service providers to meet ADA or BS 8300 standards ensuring all operable parts such as handles, pulls, latches, locks, exit devices ensuring effortless and safe access to all.

The products within the Access to Health range have been carefully packaged considering the “whole life cycle costs” of ironmongery and as well as performance aspects together with practicality and security. Regardless of the type of healthcare facility — hospital, long-term care building, Day surgery centers or even a physician's clinic — Our objective remain the same that is to create a safe and a secure environment in the facility.

Our technical consultants can prepare detailed ironmongery schedules for your specific requirements managing the hardware requirements for each individual project, ensuring a coherent package of products and by standardizing solutions that allows an efficient installations and maintenance activities, better management of key systems and smoother performance of electronic access control and electrified door hardware.

Patient Room Doors

Safe, private, yet freely accessible to staff with gurneys and carts, doors equipped with ADA-compliant hardware from our comprehensive hardware range offer easy, effortless opening. Besides the standard hardware products specially designed anti-ligature solutions with unique sloped and recessed surfaces are also offered additionally which cannot be used as a ligature ensuring safety of the patients.

Cross-Corridor Openings

Cross-corridor openings are most frequently used openings any other openings in a medical facility. Although this opening's main purpose is to control the spread of fire and/or smoke while keeping patients and staff safe in emergencies, these openings also need to withstand high levels of traffic. Our innovative solutions defend against fire and smoke in emergencies, while withstanding the impacts caused by the equipment banging in to them.

Behavioral Health Solutions- Antiligature

From secure doors and frames to locks, hinges and anti-ligature openings, our comprehensive selection of products helps protect patients as well as staff.

Antimicrobial Solutions

Interestingly, the door hardware is one of the most touched surfaces in any facility and we provide door sets with anti-microbial feature that prevent the growth of germs and are built to withstand heavy usage on a daily basis. It creates an antimicrobial barrier on a common touch point, our products break the chain of infection, helping to reduce the transmission and spread of microbes. A range door sets are available and has been chosen for its high quality, durability and also for the aesthetic values.

Secured Access

Haroon Company has expertise in implementing innovative access control solutions to the health-care facility according to the project's unique requirements, allowing clients the ability to secure sensitive areas in the facility including Pharmacies, patient records, medical supplies, electrical or building controls etc. our systems are designed for economical installation, operational flexibility and easy usability.

Accessible Hardware

We offer of the most comprehensive ADA compliant accessible hardware allowing it to cater to all needs: people with reduced mobility, the elderly or those who just want greater comfort. From standard length grab rails to custom made assemblies, we can design a layout to suit each individual requirement, ensuring that the facility meets current building regulations.

Automatic Door System

We offer elegant automatic door operator specifically designed for internal sliding doors commonly used in healthcare for the easy access. Powered by the innovative magnetic linear motor technology developed by MOTION4, it measures only 60 mm high x 65 mm deep, combining the size of a manual sliding door track with the functions and performance of a traditional automatic door operator. Additionally, automatic openings operated by touchless actuators (signaled by the wave of a hand) not only minimize the spread of hand-to-hand infection but they also allow workers to be more efficient as they move with equipment through a facility

Door Controls

We offer full compliance with the opening and closing forces recommended without compromising the fire integrity of the door set. All of our door closing devices meet the EN standards and are offered with full certification and with long product warranties.

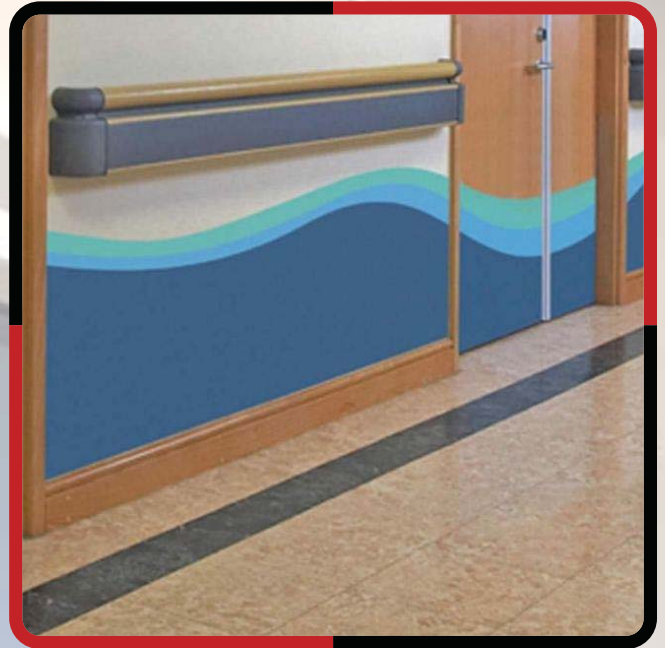

Signage Solutions

We offer professional signages which helps to organize and identify spaces so that the patients, employees and visitors can easily find their way around. Additionally, ADA signs that we offer will keep your facility compliant and accessible to all.

Impact Protection

The protection of the wall and door is of paramount importance and often overlooked. We can provide various products in many colours and finishes to give high definition contrast between door edges, frames and walls, as well as offering protection on corners, door and wall surfaces at mid-rail and floor level.

Hospital Latch

Healthcare environments often requires special hardware for noise reduction to help patients heal faster and staff perform more accurately and efficiently. Our UL listed ADA compliant Push/pull latch hardware offers a quieter operation all the time, providing healthcare organizations a reliable solution for noise reduction initiatives.

Anti Radiation Locks

The performance capabilities of doors in areas of significant constraints, such as X-ray, electromagnetic field and laser operation pose a number of technical challenges. Combine this with the increasing integration of surgical and radio-diagnostic teams into areas of combined use means that our door sets need to pose the attributes of both X-rays, electromagnetic and laser protection with additional performance characteristics. Keeping in mind this complex situation we offer special antiradiation hardware ensuring a complete safety.

Finger Protection

Trapping fingers in hinged doors can cause horrendous injuries. We provide heavy duty finger guard that completely covers the gap, offering superior safety and robust protection that's built to last. Particularly effective in challenging areas, with constant impact from children, pushchairs and wheelchairs etc. Additionally, the solid construction of the finger guard helps to withstand tough knocks, helping to protect the door edges.

Automatic Swing Operator

We provide ADA compliant fully automatic single or double door operator for swing doors. It provides a host of features that deliver the quality and reliability which healthcare environments demand. Effortless opening and closing – at a constant speed. Advanced electronics with self-learning microprocessor control ensure optimal power.

Master Keying System

We offer scalable, high-quality, patented, mechanical Master Key system which is particularly suited to health care application requiring the highest security locking. We also offer combination keys where in mechanical master key systems are often used in combination with electronic access controls for both cost-related and security reasons. This enables the property entrance to be kept under electronic surveillance whilst the doors in the inner area are organized and secured with a mechanical master key system.
